PROFESSIONAL SUMMARY

Final-year Informatics Engineering student at Homs University (expected graduation 2027), focused on front-end development with React, Next.js, TypeScript, and Tailwind CSS. I build responsive, user-focused web applications with clean, reusable components, collaborate through Git and GitHub, and have five projects deployed live. Seeking an internship or junior front-end role to contribute to a team and grow through code review and collaboration.

PROJECTS

Personal Portfolio Website | Next.js, Tailwind CSS, Motion
Live: adnan-altellawy.netlify.app | Code: github.com/Adnan-AlTellawy/portfolio

- Designed and built a responsive portfolio presenting my projects, services, and contact details, with light and dark modes and smooth image and text animations using the Motion library.
- Implemented a contact form and adaptive navigation across mobile and desktop; deployed on Netlify.

Food Del: Online Ordering App | React
Live: restaurant-app-adnan.netlify.app | Code: github.com/Adnan-AlTellawy/restaurant-app

- Implemented an end-to-end ordering flow from menu browsing to checkout and order tracking, with category filtering and a cart that automatically calculates quantities and totals.
- Built login, checkout, and order-tracking screens; managed state with React Hooks; responsive layout deployed on Netlify.

Resume Builder | React
Live: resume-builder-24.netlify.app | Code: github.com/Adnan-AlTellawy/resume-builder

- Built a web app for creating a professional resume in minutes, with live preview while typing and multiple selectable templates.
- Added PDF download and persistent user data between sessions.

Weather Pro: Forecast Web App | Next.js, Tailwind CSS, Framer Motion, OpenWeatherMap API
Live: adnan-weather-pro.netlify.app | Code: github.com/Adnan-AlTellawy/weather-pro

- Built a weather app showing current temperature, wind, humidity, and a multi-day forecast, with city search powered by data fetched from the OpenWeatherMap API.
- Handled loading states and errors such as unknown cities; added an Arabic and English interface that remembers user settings.

QuickCart: Tech E-Commerce Store | Next.js, Tailwind CSS, Context API
Live: store-app-adnan.netlify.app | Code: github.com/Adnan-AlTellawy/e-commerce-store

- Adapted and deployed an open-source Next.js storefront template (QuickCart by GreatStack, MIT license) with an animated promotional slider, shop page, product detail pages, and a seller portal.
- Worked with its Context API cart state and responsive Tailwind CSS component structure.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React, Next.js, Tailwind CSS, Motion

APIs: Consuming external APIs (OpenWeatherMap), API testing with Postman

Tools: Git, GitHub, Netlify

Concepts: Responsive Design, Component-Based Architecture, State Management (Hooks, Context API)

EDUCATION

B.Sc. in Informatics Engineering, Software & Information Systems
Homs University, Syria | 2022 – 2027 (Expected)
